English · Uzbek · Russian

SUMMARY

Project Manager with a software engineering background who owns commercial products end to end. Took a stalled logistics platform to production in 2 months and grew it to **1,000+ business clients** and **4,000+ orders per month**. Runs Scrum delivery for cross-functional teams, works directly with engineers on architecture and APIs, and ties delivery to business metrics.

2+ years	**2 months**	**1,000+**	**4,000+**
project management experience	to relaunch a stalled product	business clients on the platform	orders tracked per month

EXPERIENCE

Project Manager, AbuSahiy Go Oct 2025 to present

Cross-border logistics platform delivering orders from China, the US, UAE and Turkey to Uzbekistan. Client mobile app, admin panel and warehouse management system (React, Python/Django, PostgreSQL).

- Took over a product that had stalled after an internal team and an outsourced vendor; **released it to production in 2 months** and ship regular releases since December 2025.
- Audited two competing codebases with the team and chose to build on the vendor's code instead of a rewrite, **saving months of development**.
- Scaled the live product to **1,000+ business clients and 4,000+ orders per month**.
- Own the roadmap, backlog and releases for the mobile app, admin panel and WMS; lead a team of 5 (backend, mobile, QA, design).
- Cut first-release scope to a launchable MVP and aligned management on phased delivery.
- Introduced Scrum and delivery KPIs: **~25% better delivery predictability**, **30 to 40% less rework**.
- Redesigned key user flows using customer journey mapping to guide feature priority.

Project Manager, Progress Solution Technologies Jul 2024 to Oct 2025

IT services company building web platforms for education, employment and banking clients.

- Managed **4+ concurrent client projects**, including edfix.uz; delivered **10% faster** than baseline plans.
- Delivered a banking project for **Xalq Banki** on schedule; tracked progress and reported to stakeholders.
- Launched the MVP of JFS (Job for Students) platform with a team of 6.
- Set up Jira workflows and dashboards for **40+ developers**; rolled out Tempo time tracking, **+33% team efficiency**.
- Standardized documentation in Confluence across 10+ projects; coordinated 5+ remote developers.

Leading Specialist, New Uzbekistan University Jan 2024 to Oct 2024

- Planned and ran 20+ events end to end; used participant feedback to improve programs.

SKILLS

Delivery	Scrum, roadmap and backlog ownership, scope management, release planning, risk management, KPIs
Product	MVP definition, user stories and acceptance criteria, customer journey mapping, prioritization
Technical	REST APIs, system architecture basics, PostgreSQL, React/Django stacks, mobile release cycles
Tools	Jira, Confluence, Tempo, Trello, Figma

EDUCATION

New Uzbekistan University, M.Sc. Project Management (Sep 2026 to Jun 2027, expected).
New Uzbekistan University, B.Sc. Computer Science (Software Engineering). Algorithms, databases, networking, machine learning.
Harbin Institute of Technology, China. New Generation of Intelligent Information and Communication Technologies (Jul 2026).
Harbin Institute of Technology, China. AI summer school: machine learning, geolocation path finding.
Coursera: Project Management certification · freeCodeCamp: OOP in JavaScript
